

Smart Public Procurement Lab

Forum zur Weiterentwicklung nachhaltiger Beschaffung

Eine Veranstaltung im Rahmen des „Konvents der Bürgermeister“

Program

15th October
2014
Vienna City Hall

The **Smart Public Procurement Lab** is an initiative by “ÖkoKauf Wien”, organized within the Covenant of Mayors and the initiative Smart City Wien in cooperation with KLIP — the City of Vienna’s climate protection program. “ÖkoKauf Wien”, the City of Vienna’s program for ecological public procurement, is inviting you to the **Smart Public Procurement Lab** on October 15th, 2014.

SMART PUBLIC PROCUREMENT LAB PROGRAM

9:00 — Expert Talks

- Robert Kaukewitsch, *EU-Kommission (DG Umwelt)*
EU-Public Procurement Policy
- Renate Hübner, *Alpen-Adria Universität*
Embodied Energy and the Optimal Usage Time of Products
- Thomas Mosor, *„ÖkoKauf Wien“*
15 Years “ÖkoKauf Wien” – An Evaluation

11:00 — Workshops

Together with you we will discuss specific aspects of sustainable public procurement to develop new problem-solving solutions. The leading questions for this discussion are grouped in four thematic clusters and can be discussed on the online-platform of the **Smart Public Procurement Lab** (www.sppl.at)

- New frameworks for sustainable public procurement
- Effects and monitoring of environmentally-friendly procurement processes
- Life cycle analysis and the optimal operating life of products
- Sustainable building and cost-efficient construction

This online-platform provides an opportunity for you to gain insights into the current discussion well in advance of the event and to help shape the detailed program for the **Smart Public Procurement Lab**. We encourage you to participate in the online discussion and to propose your own topics, which can then also become discussion topics for the **Smart Public Procurement Lab**.

The following leading questions have already been proposed for discussion on www.sppl.at:

- What can the public administration change and accomplish with their demand behavior?
- What are current and emerging methods for measuring environmental effects?
- International Trade Agreements — Opportunity or Threat?
- How can life cycle assessment become formalized in public procurement processes?
- What possibilities are created by the new EU procurement directives?

The discussion will be concluded in four plenary discussions open to all participants.

17:30 End of Workshops
